

Stormwater and Aquatic Environment Protection

Sediment that does not reach water bodies cannot harm fish or other water life.

Point of Capture of Sediment

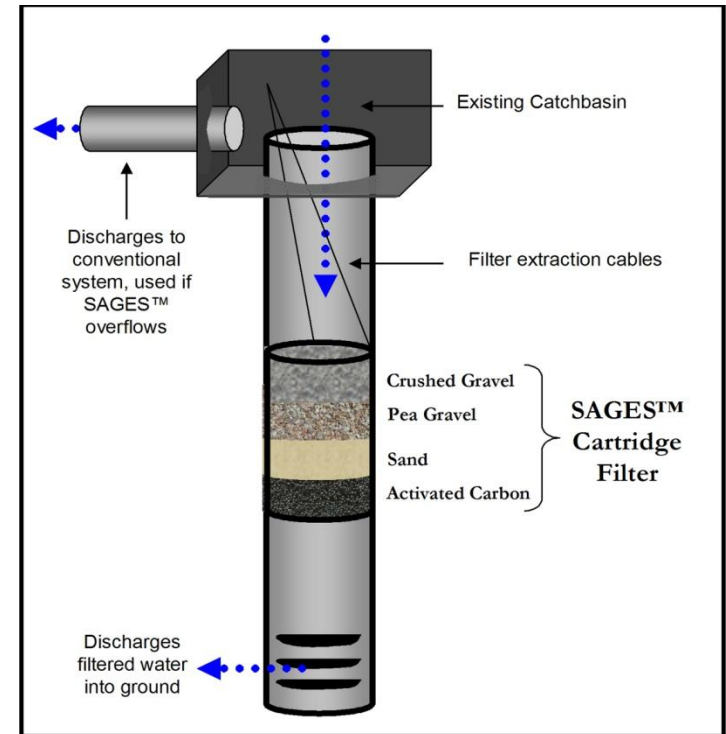

**SAGES™ used in infrastructure
such as catch basins, manholes, grit
chambers**

Site With Sages(TM)

Possible Projects Where Sediment Captured

- Municipal/Public Paved Parking areas
- Municipal/Public catchbasins
- Municipal/Public roads
- New Residential Developments
- Restaurants, malls, industry, parking lots
- Hydraulically connected pavements and their separation
- Near environmentally sensitive areas
- Sidewalks
- Avoid small gasoline and automotive

100% of all trash is removed from surface water until the SAGES™ unit plugs or until the hydraulic capacity is exceeded.

Maintenance With Sages(TM)

SAGES™ being removed

Sludge Collected that did not reach river
